# Introduction

Sky-Walker Academy is a private independent learning provider, based within the idyllic farming village of Buwit in South Bali, just fifteen minutes drive from the world-famous resort of Echo Beach, Canggu.

Created by professional parent-teachers with a vision for inclusively affordable international standard education, giving students from working families and small business owners an opportunity to pass Cambridge qualifications, that otherwise might not be attainable, in a contemporary holistic learning environment.

We deliver the mother of Cambridge Exams material; the National Curriculum of England, as published by the UK Department for Education (DfE). Recognised by the world's best colleges and universities.

# YEARBOOK REVIEW 2022-23

## MRS SRI-YOUNG THE SCHOOL DIRECTOR

The academic year of 2022-23 was truly an inspiring one, despite the challenges that initially loomed. The year began with major global economic clouds that left the international community in Bali unsettled. Many families contemplated relocating - due to the lingering threat of ongoing COVID-19 restrictions and policies.

These restrictions had previously frozen 90% of the island's tourist industry. Moreover, the Russian military invasion of Ukraine triggered further economic uncertainty, with many families returning from their summer holiday travels reporting a cost-of-living 'crisis' and soaring inflation. Gratefully, business in Bali began gradually started picking up, to the relief of many Bali residents.

We continue to pray for a peaceful resolution to the Ukraine war and sincerely hope that the lessons from draconian lockdown policies during the pandemic have been learned, especially in regard to schools. It is worth noting that thousands of schools were closed for the best part of two years between 2020-22.

In hindsight, this seems to have been an ill-conceived costly policy. National average IQ levels have fallen; levels of child mental health issues soared (according to the CDC) and millions of children fell behind academically.

It is worth mentioning that Sky-Walker's students did not suffer. A testament to the hard work and dedication of our brilliant faculty.

In fact our independently verifiable academic learning performance data, shows an average increase of 1.5 grades per 12-months, for all of our students as a whole.

As the 2022-23 academic year has progressed, it's become increasingly clear that the full recovery of the Bali economy is now in full swing. With new waves of young families arriving on the island to build their lives.

This has encouraged us to move forward with another classroom building project, to cater for the growing number of student applications and invest further in the younger generation.

Today, we are excited to showcase a beautiful Kindergarten and Elementary complex, adjacent to the PlayZone. The construction was made possible with the full support of the village of Buwit - which is important to us. Our wider vision of world-class education in Bali, led primarily by Balinese teachers, is gradually being realized through our joint efforts.

With our commercial kitchen upgrade, the new classroom building, and upgrade for the PlayZone (multi-sports play-surface system) - we now have world-class facilities that have positively impacted visiting parents eager to join waiting lists for limited classroom spots in 2023-24. Our long-term plan is to expand the land area, though this will require substantial capital investment. All in good time.

Therefore we remain optimistic and excited about the possibilities that lie ahead and look forward to continuing to provide an excellent educational experience for our members, by the grace of god and hard work.
